

Zürich, 09.12.2019

## Press release

### **Stefano Camuso is appointed managing director of the new ICT and automation pole in Switzerland**

**VINCI Energies in Switzerland brings with Stefano Camuso, Switzerland's head of T-Systems, a renowned, experienced manager on board. From 1 February 2020, he will take over the management of the newly created management pole direction "ICT & Automation", including the VINCI Energies dedicated brands with Axians (ICT services) and Actemium (electrical and automation solutions for industry).**

This pole includes 930 employees with a turnover of around 300 million Swiss francs. VINCI Energies is thus addressing the national growing demand for integrated solutions for industries, digital transformation, IoT, telecom infrastructure, cyber security and managed services. Stefano Camuso, leading this new pole, will create large synergies and a consistent ecosystem for smart industry solutions, addressing the customers of Axians and Actemium in Switzerland.

VINCI Energies brings the worlds of Axians and Actemium close together - digitization and industrial technology - and bundles its expertise in growth topics such as digital transformation, managed IT services and cyber security for IT and OT.

Stefano Camuso has around 30 years of experience in the IT market: After working for EMC Switzerland and Avaya, he was most recently Managing Director of T-Systems Switzerland AG. He attaches great potential to the interaction between the two network brands: "With the system integrators and service providers Actemium and Axians, VINCI Energies offers a unique constellation and a comprehensive portfolio for digital transformation in Switzerland. This is proven by the highly qualified employees every day in impressive projects. The high level of competence of our staff and the decentralized structure of the VINCI Energies network, coupled with a unique management philosophy that promotes entrepreneurial thinking and action, are very good prerequisites for sustainably succeeding in an agile market characterized by digital transformation. "

Dr. Reinhard Schlemmer, General Manager of VINCI Energies Europe East, explains the plans of the Group for Switzerland: "VINCI Energies in Switzerland operates in very important, dynamic markets. By merging our ICT and automation business into one management area, we are prepared for the future in order to continue to grow in the areas of IT and telecommunications infrastructure, digital transformation and industrial technology. We will also continue to extend our international cooperation with Axians and Actemium in other countries. "

Actemium is the VINCI Energies brand for electrical and automation technology for industry, which supports well-known customers in Switzerland in digitizing and automating their processes. Axians is active as a system integrator and service provider in the expansion of telecom infrastructure, digital transformation, ICT and cloud infrastructure, cyber security and digital process consulting. In the area of IT security, many energy suppliers, pharmaceutical companies and municipalities rely on Axians. With its innovative software solutions, Axians also contributes significantly to the digitization of public administration in numerous cities, municipalities and cantons.
